# Resolve Software Issue

UML Activity Diagram Example

An example of **UML activity diagram** which shows how to resolve an issue in a software design. After ticket is created by some authority and the issue is reproduced, issue is identified, resolution is determined, issue is fixed and verified, and ticket is closed, if issue was resolved.

This example does not use partitions, so it is not very clear who is responsible for fulfilling each specific action.

An example of UML activity diagram to resolve an issue in software design.
