# Online Shopping Login Controller

UML Object Diagram Example

This is an example of **object diagram** which shows some runtime objects related to web user login process. Class **instance** loginCtrl of the LoginController has several **slots** with **structural features** of Integer and String types and corresponding value specifications.

The instance of LoginController is also associated with instances of UserManager, CookieManager, and Logger. LoginController, UserManager, and HibernateUserDAO (Data Access Object) share a single instance of Logger.
